The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown.

Brown shows a scissors jack having trunnions 32,56, a rotatable shaft 52, and a pin 41 for limiting axial movement of the shaft.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-6 and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown in view of Rauscher.

Rauscher teaches a scissors jack having spacers 17.

To provide spacers in Brown where desired would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Rauscher. One of ordinary skill in the art would have been motivated to do this in order to maintain the position of the rotatable shaft.

Claims 7-12 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/15/06.
